Robyn Spady
The Taming of the Hue:
Techniques for the
Color Challenged

Robyn Spady has been weaving for over fifty years. Robyn is fascinated by the infinite possibilities of crossing threads and loves coming up with new ideas to create fabric and transform it into something new and exciting. She is committed to turning the weaving world on to double-faced fabrics, four-shaft weaves, uncommon and advanced weave structures and passementerie techniques.

Color can feel like an ominous world to enter. What seems like second nature to some can be a vast sphere of uncertainty to others. The good news is it doesn't have to be that way. In this presentation, Robyn will explore a variety of tools, techniques and strategies to assist in finding different ways of incorporating color into projects and give you more confidence in discovering new color horizons.
