

**Weavers Guild of Kalamazoo  
Monday, March 9, 2026**

**6:30 pm - Library & Social Time  
7 pm - Meeting  
8 pm - Zoom Program with Jennifer Moore  
"Mathematical Design—Geometry in Textiles"**

**This is a Zoom & In-Person Meeting**

**Our meeting place is Portage United Church of Christ  
2731 W. Milham Drive, Portage, MI**

**Visitors and Guests are welcome!**

Since ancient times, human beings have observed the world around them and found recurring patterns in nature. The Golden Proportion, the Fibonacci Series, symmetry movements, tessellations and fractals are some of the mathematical ideas that have found their way into art and architecture for thousands of years. In this fascinating slide show we will see examples of how these ideas have been used throughout history, various cultures and particularly in contemporary fiber art.

Jennifer Moore received her MFA in Fibers from the University of Oregon where her area of specialization was exploring mathematical patterns and structures of music in doubleweave wall hangings. She has exhibited throughout the country and overseas and has received numerous awards for her work. She has been featured in many publications and is the author of *The Weaver's Studio Doubleweave*. Jennifer lives in Santa Fe and travels the world to study weaving and teach workshops.
